

Move to video grabbers' successor product

As technology changes, Epiphan periodically discontinues a product and substitutes it with a successor product. Information covered in this succession plan gives our customers the confidence to migrate from the following discontinued video grabbers: DVI2USB, DVI2USB Solo, DVI2USB LR and VGA2USB HR to [DVI2USB 3.0](#).

DVI2USB 3.0 delivers the same functionality that our video grabbers are known for, such as capturing uncompressed video to seamlessly integrate with third party encoding, scaling and streaming software.

FEATURE COMPARISON

					
	DVI2USB 3.0	DVI2USB Solo	DVI2USB	VGA2USB HR	VGA2USB LR
