

GOODBYE
VGA2USB!

Use this guide
to migrate to
AV.io HD or
DVI2USB 3.0

For more than ten years VGA2USB has been capturing videos around the world.
It's been a great success and we've learned a lot from it.

Using the years of feedback provided by users of VGA2USB, Epiphan developed AV.io HD – the perfect fit for more than 90% of VGA2USB users!

For capturing speciality resolutions or if you need the Epiphan Capture Tool, we recommend DVI2USB 3.0.

Capture more
with better quality!
VGA, DVI and HDMI™
at 60 fps.

Both AV.io HD and DVI2USB 3.0 are small, durable video grabbers, housed in the same type of aluminum enclosure and use the full-sized connectors you're familiar with. See page two to pick your successor product.

AV.io HD - PROVIDING BETTER PERFORMANCE & VIDEO QUALITY

- ✓ Captures at standard VGA resolutions.
- ✓ Contrast and brightness controls.
- ✓ Vertical and horizontal shift controls.
- ✓ No drivers to install!

Automatically adjusts your input resolution to common output resolutions.

AV.io HD is the simplest way to capture video! No drivers to install, use it with any computer that has a USB port. Captures at 15, 30 or 60 fps, as directed by your capture application.

DVI2USB 3.0 - PERFECT FOR SPECIALTY VGA VIDEO CAPTURE

- ✓ Handles specialty resolutions and custom VGA modes.
- ✓ Full control of adjustments, color space and resolution for pixel-perfect capture.
- ✓ Captures at 60 fps (4:2:0) or 30 fps (4:2:2).
- ✓ Includes the Epiphan Capture Tool.

Use DVI2USB 3.0 to capture video from any resolution up to 1920×1200, even if it uses a custom frame size or VGA mode. Like VGA2USB, this video grabber requires installation of the Epiphan video grabber drivers, comes with the Epiphan Capture Tool and has an SDK for custom application development.
